

Survey Results concerning the GI-CORE Summer School for Medical Physics 2014

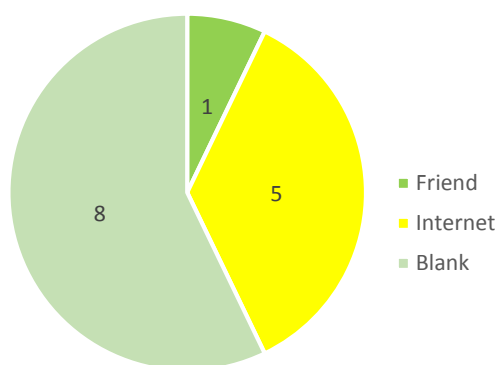

5th September, 2014

Global Station for Quantum Medical Science and Engineering

The GI-CoRE Summer School for Medial Physics accepted 14 participants in total, including participants from Vietnam Hue Central Hospital Cancer Center, Kyoto University, Tohoku University, Miyakojima Radiation Clinic and Hokkaido University. All of the participants successfully completed the course and were awarded a completion certificate. They provided us with positive feedback in general but at the same time there were some areas for potential improvement with the summer school identified in the responses. Please find specific details from the graphs and comments below.

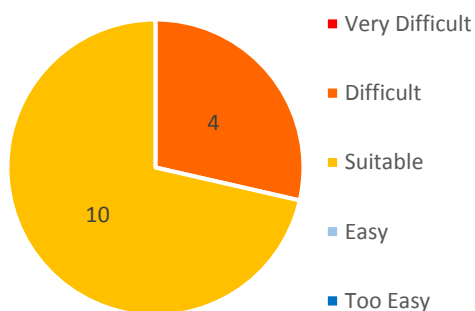

1. Source of Information

How did you know learn about that GI-CoRE Summer School was recruiting participants?

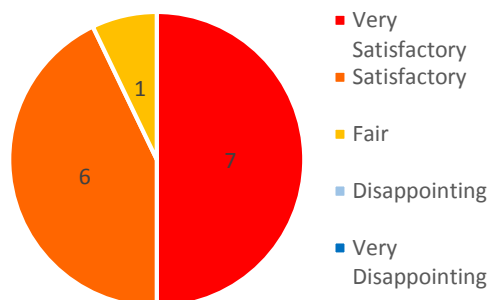

2. Lecture, Practical Training and Booklet distributed to the participants

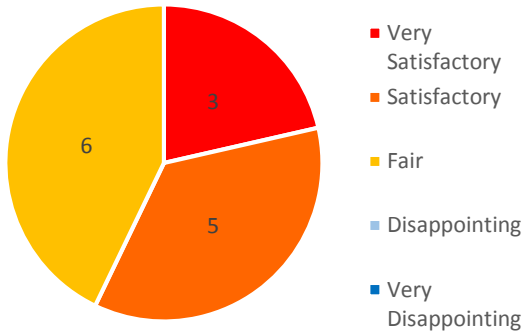

Contents of the lectures

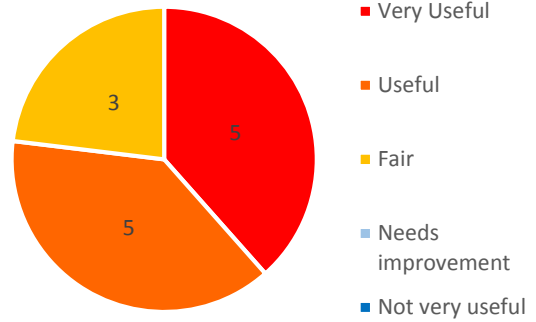

Quality of lectures

Practical training

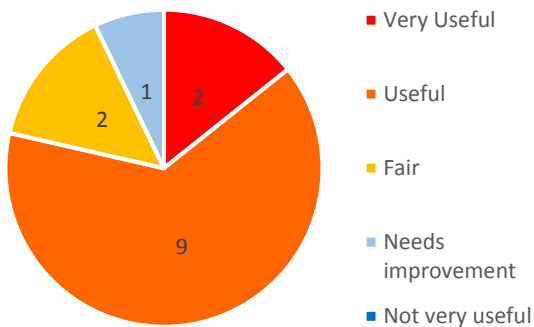

The booklet

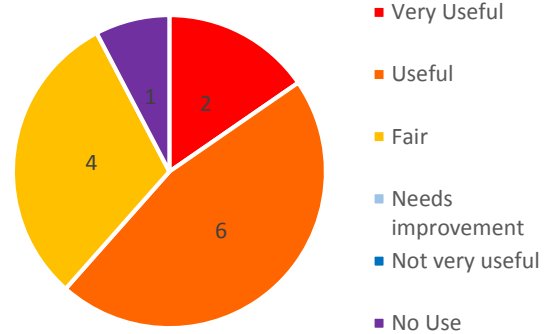

3. Events and Lunch included in the Summer School

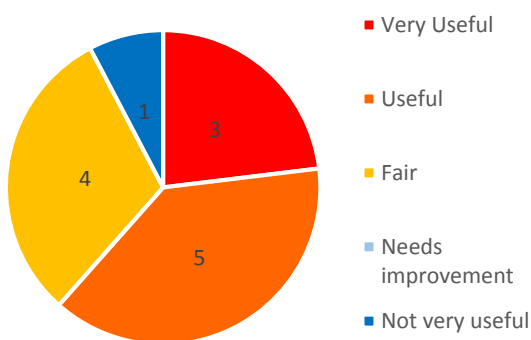

Evening Session

Icebreaker Reception

Free Discussion

Lunch and Coffee breaks
